

ESTATE GROWN - ESTATE MADE

our environmental commitment

Margan Family Winegrowers is committed to producing wine sustainably.

Our land is managed in a balance of vineyard, winery, cellar door and restaurant operations with care for our open space and native vegetation -to produce exceptional wines and provide our guests with memorable experiences.

Our commitment to protecting the environmental values of our property for future generations ensures we integrate environmental responsibility and accountability into all aspects of our operations.

Our staff are provided with training, support and encouragement to continuously improve environmental performance in their areas of responsibility, such as initiatives to prevent pollution, save energy, minimise waste and conserve our natural resources.

We actively communicate our environmental commitment to our suppliers, contractors, customers, the community and other interested parties.

We continuously monitor and improve our environmental performance by maintaining an environmental management system with objectives and targets that exceed regulatory obligations.

Our environmental management system is reviewed, evaluated and improved through audits to industry environmental codes of best practice plus certification to recognised wine industry standards, such as the Winemakers Federation of Australia's environmental management program 'Entwine'.

Please share in our commitment to producing fine wine, food and experiences while minimising our environmental footprint.
